LEARNING ENHANCED ENGLISH PROGRAM (LEEP)

Program Overview:

The Learning Enhanced English Program (LEEP) is an eight month, full-time program that runs from September to April. This program is designed for individuals 20 years of age and older wishing to acquire proficiency in academic English skills needed to gain entrance into high school credit courses, including Concordia's UCEP program. This program offers an Enhanced English Course, mathematics, science and computers. Students will be placed in the appropriate upgrading program based on an interview and the results of placement testing. Please note that a Canadian Language Benchmark score of Level 5 is required.

LEEP
TO
SUCCESS

Course Descriptions:

Academic Management

Students develop skills in communication, planning, setting and achieving goals, studying and coping with stress in an academic context.

Computers 70 Introductory Computer Skills

This course focuses on the development of basic computer skills. Content areas include introduction to hardware and software, file management, Internet, and basic word processing commands and functions, including document editing.

Learning Enhanced English (LEE)

This course is intended to address grammar basics and composition writing. It will introduce the students to English Literature based on the Alberta Curriculum for English Language Arts.

Mathematics 70 Math Skills Development

In this course students develop the skills necessary for success in Mathematics 90 or high school level (grades 10-12) mathematics courses. Students review operation with whole numbers, fractions, decimals, ratios, and percent. Students develop measurement and graphing skills and become familiar with the fundamentals of algebra, geometry and trigonometry.

Science 70 Science Skills Development

Science 70 is designed to provide a foundation for future science courses including Biology, Chemistry and Physics. Students are introduced to the language of science, scientific method, laboratory protocols, and the basics of scientific study. Students are encouraged to develop open-mindedness, curiosity, and critical thinking skills when exploring the complexity of the natural world.
